

Learning Obstacles

- 8 period schedule = WIN
- 8 period ^ (per 2) days...no changes
 - It gives you so many more class options
 - It helps you build endurance for longer classes that you would expect in college (1 ½ hr. classes)
 - You have more time to ask questions and absorb material
 - It allows students to really try things that interest them, while taking core classes
 - Allows students to be more involved in the community and stay balanced
 - Academically prepares students!!!
 - Limited class options => more options
 - Certain requirements in fields I'm not interested in => change
 - Only so many periods
- Admin. Goes out of their way to get students in trouble sometimes
- If majority of students struggle with math, maybe the math teachers should be very qualified
- Too tired to learn efficiently. A later start would improve grades. Guaranteed.
- 8 period schedule allows more classes that can be taken. Longer periods (1 ½ hours allows for more focused learning and overall absorption of what's being taught.
- Forced to take classes that we'll never need/aren't interested in.
- School Starts Too Early!! –can't learn in morning
- Shorter day
- ART REQUIREMENT-Not enough room in schedule (I have to take over summer)
- More ec activities
- More time for lunch
- Outside lunches
- 8 periods
- PORTABLES →Issaquah High & outside school in rain!

- Didn't know what to take freshman yr. to fulfill requirements for graduation, so now I have to change my schedule to get the correct credits
- Add extra summer days Not from breaks
- More electives
- More "semesters"
- Grad. Requirements should be same as college entrance requirements
- Starts too early
- More time for HW
- Quarters?
- Under qualified teachers can easily ruin a course
- Needing so many elective credits can prevent people from getting all their core classes done/
- Not offering required courses
- I wish that there was more flexibility w/PE credits because they limit the #of classes I would like to take.
- I wish school started later because adolescents need 9-10 hrs per sleep a day to be healthy
- I wish IB teachers would coordinate school work so giant projects won't be as conflicting
- Problems w/11 day absent constraints
- Having to have required courses & just having 6 periods a day. Being able to fit all classes needed & wanted into 4 years in just 6 periods a year. 😊
- Staff underqualified. Required courses especially
- Sleep, waking up at 6am does not help with 1st three periods
- Having required courses
- Having 5 teachers
- Not having a kitchen
- People stealing stuff
- Make outside classes cheaper. (like driver's Ed)
- *Attendance Policy →if grades are kept up, and student missed 11+ days, I don't see a problem
- outside sports count for more credit
- Don't make students take classes they don't want

- Don't waste time & money w/stupid classes → cinematic visions is a waste of time
- AP not IB @ Skyline
- Qualified T.A.s to assist with class work
- I actually love the class schedule at LHS. It provides numerous classes that suit all different students and provides them with skills to succeed in college.
- 8 periods > 6 periods BASIC MATH
- 8 periods provide skills to students that desire them.
- More periods → *yes!
- Being able to sleep in longer to be able to learn more
- More opportunity to do more things in the day, so we can have experience (something we don't have)
- Need time to be able to do health
- I think one of the main obstacles I've had to face is being able to choose the classes I want but still complying with credit requirements. I HATE science but know that colleges want an extra year-two years of science. Therefore, I am forced to take a subject I don't particularly favor to satisfy future college requirements.
- NOT Enough time for IB students! More things should count for oc-ed
- Start school "slightly" later, help concentration
- Reduce P.E. credits requirements
- Early school time makes it really difficult to focus because I'm still half asleep!
- P.E. credits make it difficult t take classes that I really want to take
- Health online fee
- Forced to take classes of no interest
