

Learning Wishes

- I wish I could learn more about the ancient cultures of the world (Egyptians, Mayans, Aztecs)
- I wish I could learn more about society in general like its mannerisms, its rules, how to act with a variety of people and life lessons in general
- Extra period
- Make more classes occur
- I wish you could take IB classes in 9th or 10th grade
- More language options (chinese)
- Later start, 8:00 am
- Block schedule is AMAZING
- Greater flexibility in schedules to take classes that actually interest you
- I wish I had more specialized classes
 - autoshop
 - higher sciences
 - more APs
 - world culture classes
 - different learning tools/technology
 - more opportunities to interact with other high schools
 - you didn't have to take a class that wouldn't connect w/what you wanted to do w/your life (ie) you shouldn't have to take calculus if you wanna be an art major!!!
- →RECESS←
- Greater flexibility in classes that count for a specific credit
- Wish we would have a mock trial team/class at liberty
- More choices in languages
- Start later→studies show students do better
- BLOCK SCHEDULES (side comments: liberty does but skyline needs it)
- Anthropology (and more sciences in general)
- Machines (how they work?)
- More space in schedule for elective classes
- More of international affairs, world studies types issues
- World politics?

- World religions (leads to more tolerant community)
- IB program at I.H.S
- ANCIENT CULTURES
- Study period?
- Forensic Science
- More business classes (sales, etc)
- Learn & earn = required; learn about taxes, bank accounts, paying bills etc
- Math teachers need to be the best teachers in the school
- Math
 - only one direction to go
 - science maths
 - should have business related math, or other areas
- History English
 - Fresh, soph, jr year no options-forced down 1 path
- BIGGER CLASS VARIETY!!!
- Taking classes I actually want to take rather than classes I have to for credits, especially senior year when you should be exploring your interests, possible majors for college!
- More smart boards
- School start much later, please!
 - I can't learn because I'm too tired
 - Unhealthy to get such little amount of sleep
 - Will die early from lack of sleep!
- 8 classes → Issaquah (like Liberty) ☺
- I wish we had even more job based classes (ie. Automotive)
- I wish I could learn more college like classes
- I wish we could learn more on sight classes (ie. Green cof)
- I wish for Recess
- I wish sports would count for credit again!
- I wish teachers taught more like professors
- PE credit! Yes! Sports mean the student is already active so there's no need for PE. It's an unneeded requirement
- Liberty Schedule
- The Liberty Schedule—4 periods/day (8 periods total)

- I wish I could learn longer because there isn't enough time in the periods to get everything done
- Also to have more real life classes that involve things that happen when we are out of school to get ready for.
- Help classes that count as credits
- Longer periods
- Recess!!
- Bring Chinese into our schools!
 - Chinese essential to success in future global economy
 - US CEO's asked what do you want our kid's skills to be? They said Computers and Chinese.
 - Chinese programs show highest increase in enrollment in colleges & universities.
 - More people speak Chinese than English!
- Extra Periods for more classes
 - Extra periods could be more fun classes, count for credit
- I wish having a schedule full of fine arts could replace occ.ed credits → can't do music all 4 years because of occ.ed and P.E.
 - be more liberal with the PE reqs
- Short "rest" period after lunch
- Adopt Liberty schedule
- Maybe a 1st sem & 2nd sem block instead of A/B days
- Let me test out of health requirements PLEASE
- Longer passing (a couple minutes) to allow a break for socializing
 - be more focused & happy
- More varying science/math electives (we only have English/SS at IHS)
- P.E.-for classes that are required we can't waive with outside activities. I wish all of my athletics and sports education counted because I learn more there than I ever have in school P.E. or health
 - lower requirements from 75/hrs semester
- Outside of school programs counting for health, too
- Classes like ballet are at Issaquah, I wish I could take at Skyline
- More classes! (like engineering, photography, culinary arts) that would connect to careers/majors in future
- RECESS! → love it
- NEVAC is cool but impossible so add more classes that vary

- Wide variety of classes, to be offered (people taking classes less interested in)
- Clubs
 - maybe have this big event where all the students go to all the clubs to try it out. Every club hosts a presentation/fun activity to get students interested. I know that now many people don't join clubs because they are scared & don't know what is going to happen so they miss out on the great opportunity. If we had this event where students can try it out, more people will be able to develop their personal interests and rise to their full potential—extra credit opportunity to go?
- Chinese Language Class!!!
 - Me and a friend are pushing for Chinese class. Chinese is an extremely important world language. 1 out of 5 people speak it, and is now very very important in the business world. I wish all my classmates would be able to learn this language. It's a lot more important than Japanese.
- I really would like to have a cooking class, or a fun period class. Where it doesn't count as credits? Because ppl always take classes that look good on transcripts so they don't have take fun classes they like. May a fun period? If that's possible? A zero period
- Learn practical app subjects like economics/get more work experience
- More electives
- Recess!
- More sciences (learn deeper too)
- Have time for electives such as culinary arts
- Specific hobby classes (could count for oc-ed credit)
- Different PE classes. Yoga was nice, maybe more
- More technological classes like programming that aren't included in the science courses
- 2 more min during passing period
- More word studies (not euro-centric)
- African studies
