Passwords that are saved by the browser may interfere with using ClassLink. Users may get messages that read *"The username and password do not match any existing users in the system."* The instructions below show how to clear passwords from your browser. Instructions for Chrome are on page two.
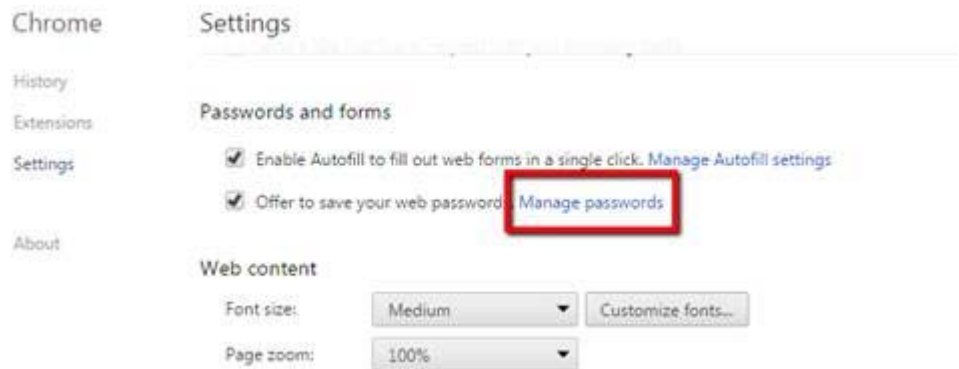

Internet Explorer 11	
Go to Internet Options. Click on "Content" Select "Settings"	
Then choose "Delete AutoComplete history" And delete saved passwords	

Chrome	
Go to Browser Settings. In Chrome you will look for "Manage passwords." Click on "Manage Passwords"	Chrome Settings History Extensions Settings About Passwords and forms ☑ Enable Autofill to fill out web forms in a single click. Manage Autofill settings ☑ Offer to save your web passwords. Manage passwords Web content Font size: Medium ▼ Customize fonts... Page zoom: 100% ▼
Select the password that is not working in ClassLink. Click the X to the right of the website for which you want to delete the password.	Passwords ✕ ☑ Auto Sign-in Automatically sign in to websites using stored credentials. When the feature is disabled, you will be asked for confirmation every time before signing in to a website.
