

ClassLink addresses the problem of too many websites, usernames, and passwords.

Through the ClassLink Launchpad students will find links to the online curriculum and tools used in their classes. Students use their school network username and password to log into ClassLink.

There are two types of links within ClassLink:

1. *SSO*: Students click the icon for the curriculum or tool they wish to access and will be immediately signed into their online account. Please note, this will only work for classes that the student is currently taking at their school.
2. *Password locker*: The first time students click on these icons they will be asked to enter their username and password, their credentials will be held in a password locker and they will not need to be entered again.
