

# Liberty High School

## Online Learning Norms (**Students**)

*We know that remote learning works best when students know what their role as a learner is. These norms have been developed to build some common expectations and guidance for how students can best engage in remote learning to create a safe and meaningful experience for themselves and everyone involved.*

### Pursue Excellence

- Log in to class at the scheduled start time and remain until dismissed by the teacher
- When possible, keep the video feature enabled during live instruction and be actively engaged in the learning
- Use the chat feature to ask questions when live instruction is happening
- Put your phone away unless it is being used for instructional purposes

### Act with Integrity

- Students are expected to do their own work
- Apply a still background feature to eliminate distractions and to protect privacy
- Use headphones if others are in the room with you
- Dress in a manner appropriate for school

### Take Care of Each Other

- Keep all comments positive and appropriate to the conversation
- Microphones should be muted when you are not speaking
- Do not engage in side conversations during instruction
- Monitor your airtime and invite others to speak
